

CSI 202 — Computer Science II, Fall 2005

Handout #1 - Friday, September 9, 2005

1. `ssh -X username@albert.washcoll.edu //` log into the server
2. `mkdir 202 //` make directory called 202 - do this only once)
3. `cd 202 //` change directory to 202
4. `cd .. //` change “down” a directory
5. `ls //` list the files in this directory
6. `emacs hw01.cpp & //` open a file called hw01.cpp with emacs
7. `g++ source.cpp -o exec //` compile source code into an executable
8. `./exec //` execute the file called exec
9. Emacs Commands:
 - (a) `ctrl-x ctrl-s //` save the file
 - (b) `ctrl-x ctrl-c //` quit
 - (c) `ctrl-x ctrl-f //` open a file
 - (d) `alt-x global-font-lock-mode //`turn on colors for c++
10. `enscript -2Gr source.cpp //` print the file in GLDS 202 called source.cpp
11. **Assigned Reading:** Finish with Chapter 2
