MAT 202 – Computer Science II

Homework #3b - Integers of Arbitrary Length

1. Name _____

2. Due: 10/10/2005 - start of class

3. Grading

Restructure your Integer class to compile and execute appropriately for the constructor, copy constructor, copy assignment operator, destructor, output, addition, and multiplication. Include the interface, implementation and a driver program. Be sure to test many possible conditions of your code. Implement working input (and additional functionality) for extra credit.

Handin Time: _____
        Total: ____ /100
