CSI 201 — Computer Science I

Handout #10

1. Procedural Abstraction (p125)
2. **Pitfall:** Declaring a variable that is a parameter
3. **Tip:** Convert long code segments that complete a single task into functions
4. Scope

    (a) local vs global
    (b) const with global variables (p125)

5. call-by-value parameters (p141)
6. an output example
7. an input example
