CSI 202 — Computer Science II

Homework #05

Provide a working implementation of a factorial function using dynamic arrays to demonstrate integers of arbitrary size.

Examples:

```
Find factorial of: 30
Factorial is: 265252859812191058636308480000000

Find factorial of: 6
Factorial is: 720

Find factorial of: 100

Factorial is:   9332621544394415268169923885626670049071596826438162
14685929638952175999932299156089414639761565182862536979208272237 58
2511852109168640000000000000000000000000000
```
