

## CSI 201 - Computer Science I

**Instructor:** Dr. Shaun D. Ramsey   **Email:** sramsey2@washcoll.edu  
**Phone:** (410)810-7485               **Office:** DUNN N102

**Office Hours:**                               M 1:30-2:20, T 1:00:-2:15,  
  W 11:30-12:20

**Text:** *Intro to Programming with C++*, by Liang

**Overview:** CSI 201 is the first majors course in computer science. In this course, you will learn the syntax of programming in C++. The course covers topics including control structures, functions, recursion, arrays, and includes an introduction to classes.

**Advising:** Like in much of mathematics, the fundamentals of programming must be solid before progressing. This course is often considered to be a difficult course for those with weaker logic, problem solving skills and thus ultimately those weak in programming.

**Exams:** Tentative exam dates are: 2/11, 3/4, 4/1, and 4/22. The final exam will be administered during its scheduled slot during final exam week. An absence on the day of the exam will result in a grade of 0. Except in cases of very extreme emergency, exams must be taken on the day the exam is given. Before a make-up test is scheduled, documentation of the extreme emergency must be given. Make-up exams for tests missed due to an extreme emergency will be arranged for a time that is mutually convenient for the student and Dr. Ramsey.

**Attendance:** Attendance is mandatory in this course. On your sixth absence, you automatically fail the course. As a matter of courtesy, you are expected to notify Dr. Ramsey before class describing the reason of your absence. You must be present on the day of an exam or you will receive a 0.

There is no distinction between excused and unexcused absences. It is quite likely that I will email you to discuss the reasons you have missed the class, but it is ultimately your duty to keep track of your absences and to contact me. Missing a class may result in missed classwork and/or quizzes.

There are no make-up quizzes or classwork. It is your responsibility to obtain assigned homework, announcements and class notes from a classmate.

Coming late to class will also count against you. In this case, every two late arrivals count as an absence. Thus you fail the course with 12 lates or 6 absences.

**Grading:** Each exam (and the final) is worth 18% of your final grade. Homework, classwork and quizzes are worth the last 10% of your grade. Programming assignments must be handed in on time and compile. Late homework (and programming that does not compile) will receive a grade of 0. Homework is due by the beginning of class on the day it is due. Do not 'touch' or modify your files on the server after handing in the assignment as this will change the time stamp. If you miss an assignment, you should always make up the work for consideration, review and mark up.

**Academic Honesty:** You are always subject to the Honor Code of Washington College. Always sign the honor code on materials that you hand in to me. All work must be your own.

**Accommodations:** If you have an accommodation that has been reported to the college, please let me know as soon as possible so I can work to meet your accommodation. You must notify me of any necessary accommodation at least two weeks prior to the requirement.

**Suggestions:** Get into a group. You may point out programming errors and discuss design with others, but all code must be of your own creation. Copying another students code will result in immediate failure of the course. Visit the math center and course mentor! There are lots of resources.

### Rough Outline

Week 1	Assignments
Week 2	Arithmetic, cout/cin, Logic
Week 3	Boolean Logic, Exam1
Week 4	Loops, Functions
Week 5	Call by Value, Call by Reference
Week 6	Array Basics, Exam2
Week 7	Arrays
Week 8	Pointers, Recursion
Week 9	Recursion, Exam3
Week 10	Structs
Week 11	Classes
Week 12	File Input and Exam4
Week 13	Electives, possible topics: Objective C, ncurses, etc
Week 14	Electives
