

CSI 201

Final Exam / Final Project

In our syllabus, there are three remaining labs and a final exam. However, as we discussed in class, we are also providing an option to complete a final project. The final project must include vectors and functions. It must be your own work and will include meetings with Dr. Ramsey to solidify scope and to examine the work.

Option A - Final Exam	Option B - Final Project
Completion of Labs for Chapter 7, 8 and 9 on their assigned due dates	Final Project Proposal/meeting/rubric will count for 2 lab scores
Completion of Challenge and Participation Activities for Extra Credit	Completion of Labs for Extra Credit
Final Examination during Scheduled Final Exam Slot	Final Project Handin (including meeting) will be used in place of Final Exam Percentage

So you must choose one of these two options. Option A follows the syllabus as given at the beginning of the course. Option B is the new path.
